Carbon Trek 5200 oclv110. 54cm frame. This is the frame that the USPS tour de france team raced. Super lite, sub 18 lbs and it could go lighter, because most of the components are Ultegra. Easton handlebars, Easton EM90 neck, Bontrager seat post, FlightDeck computer, Creek Cane S2, Rolf Vigor Primo wheels(700mm), FSA Crank and Rolf Vigor hubs. Dura ace cassette, and FSA carbon crank. Bike rides like a dream, but the seat is scuffed, a couple stickers have scratches and the break shifter caps are missing (\$8 part). I'm torn between keeping this bike and selling my cannondale with full dura ace...I'll probably post that as well and keep whatever bike doesn't sell. I have a new found love for MTB and can't commit to the time needed for enjoying the road. Since it's the middle of the season and there is some cosmetic wear...\$900 seems fair. Call or email Sean
