HARLEY

steel braided clutch, brake, and throttle cables

Dyno: 100 Foot pounds of Torque
93 Horsepower

Runs great! I have replacement stickers for gas tank, does have some scratches and some chips. I've deducted that stuff out of sale price.

Also, rear pulley teeth are getting worn, but I know where you can get a new one for \$300.00...which I've already deducted out of sale price.

Selling it because I bought a new bike and want to pay off some bills.

I have roughly \$26,000 invested into bike.

If interested PM me or call me at

In Gillette, but will make arrangements to delivery for buyer.
