

Lets Change the World Together (Burlington, VT)

Location

Vermont
<https://www.genclassifieds.com/x-632890-z>

What have you done to make a difference today? Was that difference made in both your life and the life of another? If not, I would like to help you make that difference for not only everyone around you, but the world. The utility companies are the largest producers of pollution, yet only a few are doing something about it.

We believe in a change. We believe that every person deserves a choice in where their energy comes from. There is no reason why we should all be locked into dirty energy, when we can break free and take advantage of cleaner more affordable energy. I am talking about Solar Power!

In the past, homeowners would have to come out of pocket with a large cash investment in order to go Solar. That is no longer the case. Now, a homeowner is able to put absolutely no money down up front, get a solar system installed absolutely free, and simply pay less for energy than what they are currently paying now. You get to save money while saving the environment.

I would like you to help us spread the word and help others make a difference just like you will. For every person you spread the word to that gets a solar installed, you will be rewarded. You will be armed with all of the tools you need. Use the contact information attached to get in touch. I look forward to hearing from you!
