

Lost Aussie (Between Sterling and Ault)

Location

Wyoming

<https://www.genclassifieds.com/x-632912-z>

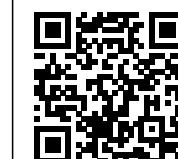

My 6 yr old red Aussie is missing. She jumped out of my truck Saturday August 8th between Sterling and Ault. It was late at night, between 10 and 12. She is mostly red with white paws, belly, and spots on her face. For some reason my phone won't allow me to upload pictures, but if you think you've seen her, please call or text me. She's coming due on shots so I would love to have her back ASAP to avoid any reason I would never get her back. She is my therapy dog, and I miss her greatly. Offering a reward of there is any information leading to my getting her back. She answers to Whiskey and is not agressive, but skittish. She is microchipped, so any vet or humane society would contact me if they had information!.
