Peak.<http://RidenowPhoenix.qualityatv.net/l/21715842/2/11572329>DESCRIPTION: 2016 Yamaha YFZ450R SEPODIUM TOPPING TRADITIONThe YFZ450R SE stands out with its stunning 60th anniversary heritage racing color and graphic scheme.Features May Include:Race-Ready EngineThe YFZ450R is the most technologically advanced sport ATV on the market today. It is simply the top of the line "racing" level Sport ATV. It combines a high-tech, quick-revving, titanium five-valve, 449cc fuel-injected engine with a lightweight, professional-caliber cast aluminum/steel chassis. The power/chassis combination will make for a championship-winning machine time and time again.Advanced FrameThe YFZ450R is motocross ready. The weldless frame is designed from lightweight aluminum, with a tension-steel bottom frame that lets the engine sit lower for excellent mass centralization. Suspension components and settings reduce weight while providing light, sharp handling and rider

comfort. Aggressive SE Style Bodywork is designed for great ergonomics and rider comfort, with more than 40 lb of foam off in the front end, and the seat is padded for the right balance to improve the back ride. It has come off the line without tons of extra weight, and it's ready to be installed. CRF150F top bar height is 33.5 inches. SE graphics look huge. Advanced Power Head™ 149cc engine has a new five-valve overhead valve technique designed to provide abundant power in the mid-range. It's a good deal, with the feeling right off idle. The higher compression ratio further improves overall engine performance. Fuel Injection The YFZ450R incorporates the Yamaha Fuel Injection for precise fuel delivery. With a big 44mm Mikuni® throttle body and 12-hole injector, this system provides exceptional atomization of the fuel for maximum power. The system also includes ISC (Idle Speed Control) for easy, reliable start-up and warming. Assist and Slipper Clutch The industry's first assist and slipper clutch on a Sport ATV reduces clutch lever effort by about 25% for less fatigue while at the same time increasing clutch plate pressure for positive engagement. Additionally, this new clutch system reduces the engine braking effect, which
