Reinventing Healthcare: Are you ready for a new approach to healthcare?

The Refreshing Springs Integrative Wellness Center is a collaboration of health care practitioners dedicated to integrating the highest standard of conventional, complementary and alternative medicine, nurturing intrinsic healing in the whole person, body, mind and spirit. It is our mission to serve, empower and partner with our patients and our community on the path to wellness, transformation and wholeness. We will serve as a model for the new paradigm of patient-centered health care dedicated to furthering evidenced based research and education in Integrative Medicine.

Seeking a dedicated group of professional and like-minded team players, committed to the goal of reinventing healthcare.

they go on to study natural modalities of therapy including herbs, diet and acupuncture as a complement and supplement to traditional medicine. Because they combine the best of both of these approaches, they are called integrative doctors.

What is Holistic Medicine?

- Holistic medicine is a term used to describe therapies that attempt to treat the patient as a whole person. That is, instead of treating an illness, as in orthodox allopathy, holistic medicine looks at an individual's overall physical, mental, spiritual, and emotional wellbeing before recommending treatment. A practitioner with a holistic approach treats the symptoms of illness as well as looking for the underlying cause of the illness. Holistic medicine also attempts to prevent illness by placing a greater emphasis on optimizing health. The body's systems are seen as interdependent parts of the person's whole being. Its natural state is one of health, and an illness or disease is an imbalance in the body's systems. Holistic therapies tend to emphasize proper nutrition and avoidance of substances--such as chemicals--that pollute the body. Their techniques are non-invasive.

Are you currently a healthcare practitioner with an interest in the growing field of integrative/holistic medicine?
