Services Available...

GUITAR REPAIR AND RESTORATION
 BCH Guitars can repair or restore your instrument transforming it from average or ordinary to extraordinary. We can return your vintage Les Paul to its glory days. Take your "modern" instrument to the twenty-first century. Re-color your quilt top or add a veneer to your Explorer, Flying V or other flat top instrument and give it some style. We do all levels of clear coat repair from deep scratch removal to strip and re-shoot using turbine automotive technology not the old compressor hardware depot paint gun. We repair cracked or broken bodies and necks, we can even clone a broken piece using the pieces and a little mechanical design magic. Don't give up on what you may think are the last notes of your favorite instrument until you consult with us. If we aren't comfortable fixing it we will recommend someone who can.

CNC MACHINING
 If its CNC precession work you need we've got it. We design and cut routing templates, cavity covers, custom wood pick-up mounting rings, truss rod covers, necks, bodies, wood bridges and we can clone

your existing parts as well. Start your new product line using our affordable array of building resources. Our CNC machine can build anything you want to better than you have a hard time finding my CNC machine has 20 years of experience in mechanical work and prototype work. We can also build your logo into a guitar body about any size we cut or in most cases your existing stock. We have a wood builder that can build a proper looking guitar in most projects, we have templates for any design body shape. We can do internal routing needs, radius fret board sanding blocks in and size made to order (including custom sized boards such as 18 or 6 degree radius) custom sanding blocks for custom contours or chambers. We have templates for bodies and much more. Give us a call and see what your options are.

GUITAR MODIFICATION
 BCH Guitars can perform upgrades and modifications of all sort. From simple electronic replacement to additional Piezo or 12 pin Roland or Ghst pickup installation. We can re-shape that uncomfortable neck
