

ENGINESHOP LIFT (Reduced today only) (125, USD)

Location **Arkansas**
<https://www.genclassifieds.com/x-633726-z>

I have reduced my price on this to my final price. I am selling because old cars are getting too hard to find. That and because I just had shoulder surgery and have to be careful from here on out.

Everything works great. As you can see from the picture, it is under my covered carport. I just pulled my compressor, tools, etc., out of my heated shop. It is dusty because I did body and paint work also.

The lift is rated for 2-tons, but has an 8 - ton high lift jack ram. This allows for higher lift and more clearance. It is made of good steal. The legs extend for more stability when needed. The wheels are steel.

I am actually in Garfield; which is just about 9 miles from the Rogers airport on hwy. 62 East, because a lot of people do not know where it is.

479-418-27 zero nine

Thank you.
