Omaha Blue Rattery (omaha)

Location **lowa** https://www.genclassifieds.com/x-634167-z

we have only a few babies left for adoption!

2 females Jupiter is top ear black Tera is top ear agouti

1 adult male Alphonse. black top ear

Alphonse came back to the rattery from a previous adopter who was unfortunately no longer able to care for him.

he would do well alone or with a spayed female. he can be a bit male agresive. he would alsp do well fixed with a patient mama.

he is the sweetest rat to his people and is such an attention whore, he would do great for a family with older children that would know not to squeeze him to hard.
