Northwestern University Department of Psychiatry & Behavioral Sciences

Your child may be eligible to participate in a research study examining the neurological effects of psychotherapy.

Is your child:

14-16 years of age

Depressed, has low energy, is not interested in the things he/she used to enjoy, has lost/gained a significant amount of weight, and/or has trouble sleeping?

Participants will be compensated for completing questionnaires, computer tasks, and two MRI scans during three visits to Northwestern University's Chicago Campus.

If enrolled, your child will also receive 12 weeks of

Cognitive Behavioral Therapy (CBT).
