Looking for a coding tutor

Location **New York**
https://www.genclassifieds.com/x-635456-z

Hello - I am seriously considering a career change into coding. I am BRAND NEW to coding and hardly know anything about it. I am looking for someone who can help me understand the different languages in order for me to get into one of the NYC coding bootcamps such as: app academy, fullstack academy, etc.

I prefer to learn Ruby first as this is the start for a lot of these bootcamps.

I'd like to meet first and discuss but the only week i have open is next week for tutoring. August 17 - 21st

I would like help with:
https://github.com/appacademy/prep-work

And help with solving at least the first 20 questions on project euler

Thanks!
Annie
