Hello, I'm selling a 2002 Rocky Mountain Fusion mens mountain bike. I am unsure of the size, but at 6 feet tall, it is just a tad too small for me. The bike has been largely upgraded, but still needs some upgrading and tuning to be optimal. I purchased the bike as a frame and fork only and started to build it back up before losing interest. I will list the parts that I can think of.

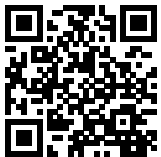

Marzocchi Z3 Bomber front fork (one of the few original parts/okay condition/definitely needs upgrading)
King headset
LX Deore crank with Black Spire third ring rock guard
LX rear derailleur
LX front derailleur
Race Face Evolve stem
Race Face Evolve Bars
Brand new Rhyno Lite front and rear rims with XT hubs
OURY grips
Brand new Kenda Nevegal tires with new tubes
Stelle Italia seat
Rocky Mountain seat post
Avid BB5 disc brake conversion

Pictures available through text.
