I had some fresh water fishes for about a month now. Which are pinapple sword Molly, 2 black mollies, gold dust molly, 4 zebra danios, 2 female guppies, 2 pristella tetra. In total I am selling 12 of my fresh water fishes together for 14 dollars. Reason I am giving it away is because my cousin gave me his betta fish which I have no where to keep besides the tank my other fishes are and like many know that bettas can't live with other fishes. So that's why I have to sell them. I got them from different stores and selected the best ones and I believe the price is reasonable. I fed them both freeze dried worms and flakes. I am asking 14 dollars because I had them for a small period of time and they are healthy and way better then the fishes that they sell in petstores. So email me of you like the fishes and I'll reply.
