I need an experienced Landscaper that knows about soil.
 I have put down Sod along my driveway 5 years in a row, I paid landscapers as well to install it, using fresh soil & fertilizer recommended by Star Nursery for this application, kept it watered, not over watered and it still dies.
 As you can see watering is not the issue as all my other grass front & rear is properly hydrated. Needs new soil , fungus conditioner,
 about 10 pieces of sod in the damaged section.,
 Let me know your experience & how \$? It may be to hot to put down sod.
