

Ridgid OF45150 Air Compressor (150 USD)

Location **Oklahoma**
<https://www.genclassifieds.com/x-636035-z>

Works great just don't use it that much. Any questions just ask!

Email or Text please.

Thanks

Here's a short description/review from this site.. http://benchmark.20m.com/reviews/RidgidOF45150_Compressor/Ridgid_OF45150_CompressorReview.html

The Ridgid OF45150 oil free air compressor is a small portable air compressor system primarily suited for site work running air nailers and the like. The system is ready to go right out of the box requiring no air fittings or assembly. It is driven by a powerful induction motor (3.25hp peak, 1.8hp running) filling a 4.5 gallon twin tank layout.

The pump used is an oil free design which means that it will not contaminate the lines with oil. This is important for oil-less tools, paint spray guns, and to keep surfaces free of contaminants when blow guns are used. Tools requiring oil for proper operation can still be used with the compressor, they need to be oiled prior to operation (by putting a few drops down their connector {which is normal}). The maximum pressure of the system is 150psi. Air delivery is rated at 6.2scfm at 90psi which is pretty.
