

ford e-350 van cutaway. 26 feet long. This is a very unique vehicle so forgive the long post. I have owned this bus for ten years, before that. This 'bus' used to be scrubs mobile...a uniform sales vehicle made by Turtle top (1 of the best) called Carry-all. It set outside hospitals and sold scrubs to the doctors and nurses. This 'bus' never had seats in it (never was a "bus") and was designed more like a r/v than a passenger bus, having things you would not usually see on a shuttle type transit bus. Things like the 50 amp shore power compartment with breaker box and generator slide out. It has a 460 engine which was re-manufactured at 130,000 miles by jasper engines. I have replaced the transmission with 1 that now has only 65000 miles on it (and I installed a transmission cooler at that time). I upgraded the running lights to L.E.D.'s. The interior has two brand new L.E.D's hooked to dimmer switches. There is a 32 inch flatscreen LCD mounted to wall behind drivers seat- and a 42 inch flat screen hi def tv mounted to passenger side wall (sorry: lost the remotes) A PS3 system is installed for Gaming WIFI internet browsing and blurays. The Playstation is installed in a clean way so that all the wires are hidden from view from the viewing area, and all plugins are behind the tv also out of view-on a surge protector. I had a welder friend install a hitch for towing; he said the hitch is good to tow a house! Bus is fully insulated (see pic of wall during restoration). Carrier R/v style rooftop heat and ac-works well- I installed a startup capacitor ONLY to help this a/c during startup so a small wattage genset will start the compressor, slideout generator compartment with small portable gen-set. 50 amp shore power compartment with breaker box. Plenty of outlets. Powerful 4000 watt power inverter. Brand new (2015) marine battery. Brand New starter installed 8-5-2015. Brand new fuel pump and sending unit and fuel filter 7-15-2015. There is a brand new R/v couch / hide a bed which folds out to make a queen size bed! This couch is brand new and never slept in.

A big bonus on this bus is an Electric passenger door-not one of those manual push rod style doors! On the driver, Stein's got a marine grade heater, 60 amp 30 hold power must be a good source) Electric water. Running water, fridge, hot water. Brand new covered wheel covers, CA diamond plate hickory trim, 8-PR roof, plenty of light, even a real stereo. The door is more than twice as large as the standard door which made much more room for my cargo/toy bay with brand new oak laminate flooring. See pics of us loading a four wheeler in the bus. The door is big enough for a Kawasaki brute force 750 with oversize tires, so most ATV's will fit IN THE bus. I used this bus for Jet ski racing and four wheeling. Wanted an open floor plan so this truck is much more than a RV, being able to haul most anything during down time. The truck looks as well at the job site as it does at the race track! Will make a great project for someone wanting a cheap, capable hauler, rv conversion, a great sign, a flea market vehicle, mobile mechanic, Limo, Taco truck, food service, Shop Breakroom, fireworks, bugout end of world vehicle, carni-vendors, band transport, or racing (like me). The

possibilities are limitless with the carry-all. I have clear title. I have owned this bus for over ten years. It worked great for that racing but my home burnt down taking my race skis (see pic) with it so the bus is no longer needed plus.... unfortunately, this bus makes an excellent moving van. If you buy be prepared to be the family moving company. I have had to help family move five times in the past two years so it must go. However NO LOWBALLERS..... I have driven this bus to carolina adventure world, buscoe beach atv park, Virginia beach wavedaze, Daytona beach freeride (twice) and speedway, Tampa bay Jet ski race, St petersberg florida tower lake, 2 pumpkin runs near daytona, Orlando Fl trips, Several races in Myrtle Beach.... so we have a lot of history together and Gas is SO much cheaper now so price is fair. I have replaced the radiator in the past. The drivers cab AC does not work. The drivers cab has a kenwood CD player and a sony amplifier hooked to pioneer 6x9's plus a pair of 6x9's in cargo-bay with two (2) ten inch subs (10 inch sub-woofers). Abs light is on, defaults to hydraulic brakes...the way I like it. There is pegboard storage board behind drivers seat. Has been mostly sitting since august 2011 because I could not afford the gas. Truck cranks and runs fine but idles ruff from sitting. Needs a good fuel injector cleaning. Windshield is cracked on passenger side. The wheel wells were rusted out when I bought the truck but I addressed this by placing brackets in them to keep them sturdy. Brand New Tires. Hidden drop down spare tire-under rear of bus. Bus is in Columbia, SC, near Harbison. I am open to offers... Open to trades- I have cash I can add for the right trade.... No text please, Scammers beware.....lowest price: \$5350.00 firm or best trade-Do Not Text!

PLEASE NOTE: If you do not have the money or trade to buy this, do not call please. Thank you and good
