Hey,

I am a guitarist/singer looking for a drummer & bassist.

I am looking for a drummer & bassist that is talented, dedicated, and that views the band as a top priority. I am very serious and dedicated to this project. My aspirations and goals are to take this band as far as it can go in playing shows, recording music, and promoting this band.

The style of music is a mix and could be considered to have elements of Rock N Roll/Grunge/Metal/ Alternative Rock. The music at times can be heavy and driving and other times really mellow and acoustic. I like to maintain having a well-balanced range in our catalog of music. I like to utilize dynamics in within the songs.

Here is a link that has a sample of some of the music. Keep in mind these are rough recordings but this should give you an idea of what the style consists of:

Check out the music and if you like what you hear we should setup a jam session to talk further. Feel free to text or call me at if you have any further questions.
