The 14" are \$3 and i have 8 bags, and the 11" are \$2 and i have 3 bags.

These are the really GOOD cable ties, the best we have to offer. Solid latch-pawls that don't break or let go when under pressure, resistant to cold temperature fracturing, great cable ties.

We have tested a lot of cable ties made by many different manufacturers and these are the ones that came through with our stamp of approval. Low insertion & pull-through force

High tensile strength is achieved from one piece, advanced pawl and teeth design

Manufactured from filtered nylon reducing particle contamination. Angled tail provides quicker initial insertion alignment & tail finger grips allow easier handling & tightening. Rounded edges provides added safety & eliminates insulation damage

They also have a formulated molding process for consistency. For Indoor and Outdoor
