

I'm female soprano with a large range and can sing in varying styles including Indie Rock/Pop, Americana, Pop, Punk pop, Electronica, New Wave etc. I am NOT a good choice for R&B, Metal, or rapping. I love those genres, I just don't have the voice for them, though I have sung hooks in the context of rap and hip hop.

You can hear some samples of my commercial work here: <https://secretsongs.bandcamp.com>

I charge \$150 per up to a 5 minute long song. This includes the Main vocal plus a sung (not copied) double of that track in case you want to thicken parts by mixing one lower. It includes one background vocal part (also doubled), potentially 2 back vocals provided they do not span the entire song.

Tracks are recorded into Logic Pro X at my home studio using a Millenia Pre-Amp and a Royer R-122 Tube Microphone. I have 15 years experience recording at home.

If you would like me to travel to your home studio we can discuss that. I can provide a formal Aiff format if you ever want it.

Please read the full range of our reading songs. All reading is in *lower case* as a means of giving a little extra help. Please, don't start with "P" words that I can't read and accurately follow for lyrics and rhythm. It can be difficult to tune an image. I know what the bees are trying to do. It's a mess.

If you want the song sung in the style of someone you love, send me a reference song so I can hear what you and envisioning.

At least half of the payment is due upfront and half after you receive the files via Dropbox. If it's easier for you, you can pay all upfront. I have references if you need them.

What I can't offer:

Professional Session Singer
for Recordings Pop, New
Wave, Indie (cole valley
ashbury hts)
<https://www.genclassifieds.com/x-6->

I can't help you write the song.
I'm currently not available to join projects, no matter how awesome.
I'm not available to sing live unless the payment is \$500+ per gig
as there is a lot more prep and energy that goes into a live performance.
I do not sing songs on spec.

Thanks for getting this far! I look forward to hearing from.
