Ok it is simple enough, you and your partner have the idea or the desire to be able to pose in front of the camera, and I'm a photographer who is looking for couples to photograph.

Ok the question that everyone always ask, why ?, Why a photographer with experience needs to offer his work for free?, simple answer, all the material that I've obtained through my work, only shows professional models, people with great bodies and looks, and I would like to show my customers normal people, where they could seem themselves reflected and not an image that scare them and make them think that they would never see themselves that way.

Eroticism is the subject of photographs, intimacy and nudity are required, not pornography, let me make that very clear, the idea is to show passion in an elegant and tastefully way and not an raunchy or offensive material.

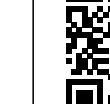

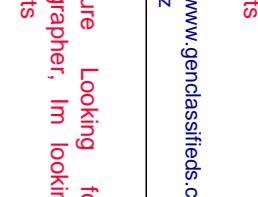

You and your partner will obtain copies of all photographs, including some retouched images in high quality, with the same quality as the ones you would find in magazines.

All images shown here are examples I've done with other couples, they will be able to give you an idea of the quality and the kind of images I'm looking to create.

I hope all this information will help you make the decision to experiment and to get something that

perhaps you've always wanted but you doubted to find a reliable person that guarantees your privacy and security. I can give you more information and more examples of my work if you need to know. I also want to mention that what I offer is something very serious and professional. Please I ask you to read and do not waste my time or yours, I do not need models or people looking for a quick way to make.
