1991 Dodge ram with a cummins turbo come with camper shell and lumber rack. I bought this truck from the second owner who owned it since 1994. The truck is in great condition with no body damage, besides the aged paint. Interior looks new. I had brand new BF Goodrich all terrain tires (only 1000 miles on them) installed on it along with new control arms and brakes. I also had the engine looked though and had a new battery, alternator, new belts, and all leaks fixed Ect. Since the work was done I have been taking the truck back and forth to San Francisco with no issue while towing a trailer and still getting 21mpg. Looking for a smaller 4 door commuter car so if you have one I'm open to trades.

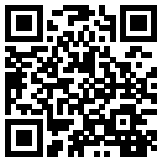

\$6750 OBO

Thank you,
