## Labels

**Straight Cut Woven Label** -- Straight cut clothing labels do not have a fold. Straight woven labels are usually sewn on all 4 sides, the top, or on left and right side only.

**Mitre Fold Woven Label** -- The ends of a Mitre Fold label are folded under and up, creating a tab to be sewn into a seam.

**Die-Cut Woven Label** -- Completely customizable shapes. applied the same way as straight cut labels.

**End-Fold Woven Label** -- These clothing labels are folded down on the left and right side. They are applied the same way as straight cut labels, but have a softer edge.

**Center Fold Woven Label** -- A Center Fold label is folded in the middle and usually sewn into a seam. Centerfold labels can also be used for sleeve and hem labels.

**Manhattan Fold Woven Label** -- A Manhattan fold is like a centerfold label, except the top of the label is folded down, creating a flap to tuck the bottom fold into.

**Loop Fold Woven Label** -- Loop folds are similar to a center fold tag, but the bottom edge is the folded side.
