

Atlanta Based 3D Printing for Your Prototypes (Atlanta)

Location **Georgia**
<https://www.genclassifieds.com/x-649866-z>

Prototype Foundry is a cloud based 3D Printing service founded by mechanical engineering students at the Georgia Tech Institute of Technology.

We have a bank of five Zortax M200 3D printers ready to print your prototype and have it delivered in 24 hours or less. Our filament selection includes ABS, Nylon, Carbon Fiber, Fiber Glass, Kevlar, and co-polymers.

Email us with your project files and we will present you a quote in less than 30 minutes. Don't have a model yet? No worries. Email us and we will schedule a meeting with you to discuss your product and one of our engineering students will work with you to design a working model of your prototype ready to print!

Check out our website for more information, pricing, and pictures! www.prototypefoundry.com

Prices start at 75 cents per cubic centimeter of print and \$10 start up.
