Hello,

I am an experienced nanny and childhood educator, and now mother of a toddler, who's looking for a position as a live-in nanny.

I have been in childcare for over 15 years and majored in the field in college. I have training and experience in both a classroom setting and a home environment.

Your child(ren) would be engaged in fun and age appropriate learning games and activities, creative art and play, trips to the park and library, and socialization with other children. Light house work involving the children will be performed and meal prep can be done if that is also something you need.

If you have further questions, I would love to hear from you.

Thank!
