I am a manager, publisher, and songwriter. Seeking on-line collaboration with solo artists and bands who are interested in recording outside material for an upcoming album or as a side project.

As a songwriter and publisher, I have secured publishing and licensing deals both here and abroad, including a number of major labels and publishers. As a manager and songplugger, I have secured indie releases and radio airplay for some of the artists who recorded my songs.

I usually work with self-contained artists who are singers, multi-instrumentalists, and producers with their own recording studio. Cover bands are welcomed. Everyone in the industry wants finished product these days. Must be able to produce full demos or "radio ready" recordings.

If you record my songs, I am willing to pitch the recordings and promote your work to the industry. Please feel free to hit me up if you are interested in a barter. Cheers.
