

# Create Training Videos for Web Development Web Technologies

Location **Florida**  
<https://www.genclassifieds.com/x-650775-z>

We're seeking talented individuals who can create video tutorials for various web development / web technologies including CSS3, Java, Node.js, Ruby on Rails, GitHub, Ajax, User Design/User Experience, C++, Angular, XHTML and more.

Only experienced trainers or subject matter experts will be considered.

The project requires:

- audio equipment which includes noise cancellation
- screen capture software capable of exporting videos in .mp4 format

This project requires no travel and can be completed in any remote location.

Project Qualifications:

Outstanding presentation skills, proficient in teaching and using various web technologies, and strong dependability. The Ability to develop a multi-hour video based course material and work within a project deadline is a must. Ideal candidates will have created video tutorials and have samples available for review. Any experience with using screen capture software (Camtasia, Adobe Captivate, etc.) will be considered a plus.

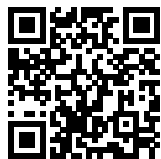

If interested, you must send some examples of video tutorials for review. Only candidates who provide training material samples for review will be considered.

Please send resume or brief explanation of experience to contact.
