

Responsive WordPress Design amp Development (Minneapolis)

Location **Minnesota**
<https://www.genclassifieds.com/x-650859-z>

I'm a freelance web designer and WordPress developer with an expertise creating responsive websites from Photoshop to finish, but I get hired for many types of projects related to HTML5, CSS and WordPress.

I have several years experience as a frontend developer, and I have a Master's Degree in Technical Communication which gives me a deep respect for content and good, organic SEO. I also have experience with WordPress security and keeping servers and databases safe, secure and healthy.

I also work on design, logo and branding projects.
