????????????????

The promising UC Irvine study mirrored a report published in October of 2014 in JAMA (Journal of the American Medical Association Internal Medicine). The JAMA findings noted that between 1999 and 2010, states with medical marijuana laws enjoyed a dramatic decline in their overall opioid related death rate; reducing it by a "lower mean" average of 24.8%.

????????????????

According to data provided by the CDC in 2010, approximately 22,134 drug overdoses involved prescription pills; of which, opioid analgesics, like methadone, hydrocodone and oxycodone were linked to over 16,650 overdoses. Leaving little doubt to the principal role opioids play in AMERICA'S REAL DRUG PROBLEM !!!!!!!!!PRESCRIPTION PILLS!!!!!!!!!!
