

# GOLD

Location **Idaho**  
<https://www.genclassifieds.com/x-651386-z>

A gold vein crossing a silver vein causing a large hydrothermal vent=ore shoot, within the altered-silicified rhyolite. EXTREME RICH based on bureau of mines reports-books of the many other mines and my 35 years of experience and knowledge. On this part of the mountain there's 5 exploration tunnels from 100 years ago and as many dig sites looking for this deposit. I have a 20 acre lode claim on the gold vein,a 20 acre lode claim on the silver vein and a 160 acre tunnel site on the 5 tunnels.I've blasted down into the hydrothermal ore shoot to 35 ft. and was still in the oxidized, rotten rock. You are welcome to test drill - the drill cuttings will more than pay the cost of drilling, even after I get half in parallel samples for verification. These ore shoots are common in the SILVER CITY area. MORE data available.....Looking for a mining company or interest to take it over or need \$5,000 to expose the veins intersection and get new assay's. Old assay's showed silver vein getting richer 5.5 oz per foot going down and the gold vein 3 oz
