Selling my original xbox. Included is the Xbox itself, 2 games (Halo and Magic the Gathering: Battlegrounds), 1 controller and the power/av cords. Everything works the only issue is the game tray sometimes sticks. However the physical override hole for the disc tray always works. You just poke a paperclip in and it pops open. This was a common issue with the original xbox
Asking \$30
I will meet you in a public space in the Greater Portland.
