LeafStone Expressions by Cindy Mulligan  
 Transforming nature into an original art piece.

Harvested leaves are cast with a special cement mix to create a durable, unique LeafStone which is then hand-painted and water-sealed. Sizes range from 12"-15" hosta leaves to the large elephant ears.

This artwork can be used outside in the summer to add interest to your outdoor patio space or nestled among the flowers in the garden.

> > Many of the LeafStones available can be filled with water to create a bird bath. If you have a pond or water feature in your yard, try adding the LeafStone to your water cascade.

> > If your hose keeps dragging into the garden, choose a hose guide made with a small leaf. The base can be pounded into the ground, then screw on the beautiful leaf for a fun surprise along your garden path. Smaller versions made for a potted plant.

The organic nature of this item may be a showpiece indoors as well.

> > I have created smaller LeafStones with holder for a tealight candle.

>> If you like to arrange fresh flowers, choose a LeafStone with a water well where you can place a pin frog.
