I am selling my 2015 GMC Denali Dually, it is completely loaded with every option. It has 12,500 miles on it. It is fully custom with a Cognito motorsports lift kit that is powder coated candy red and includes fox reservoir shocks and rear deaver leafs for an awesome ride. 22" American Force independence wheels wrapped in 37" Toyo MTs. It has Amp research running boards and a 54" Rigid Industries Radius led light bar. All of the emissions equipment has been removed and it has been tuned with efi live tuning, 5" exhaust and down pipe, AFE intake, Fass Fuel 150 and edge CTS insight. I do still have all if the emissions equipment and it will go with the truck if the buyer wants it. I have receipts for over \$28,000 worth of aftermarket upgrades after the price of the truck. Asking \$77,900 and that's way less than I'm into it. Call Jason @
