

LOOKING FOR DEVS website, database, mobile, RfidNFC devs ASAP (Downtown detroit)

Location **Michigan**
<https://www.genclassifieds.com/x-676366-z>

We are a start up looking for a number of VERY passionate/energetic programmers.

This is creating a product from the ground up past our current demo for large scale resorts/casinos/hotels etc so no I don't need a basic website programmer or contract work. I need full time (probably a lot more) personal willing to put in a lot of programming work to make the biggest new product in tech that Detroit has ever had.

We need.

- Database heavy person that is talented with database and analytics (clients info).
- Mobile apps particularly IOS and Android.
- Website and personal accounts programming.
- Linux, windows (.NET), and website analytics will be huge.

If you have experience with Rfid, NFC, Payments (stripe or paypal) or working with Hotels, Casinos, Resorts (ski is fine too) are all big bonuses!

Currently need a electrical mechanic/engineer and Accounting and Lawyers as well!

I am not looking for a typically 9-5 worker, anyone lazy that doesn't want to work with a start up etc.
I am looking for: Integrity, ENERGY, Intelligence and more ENERGY.

I've got investors, connections with our biggest clients saying they will buy the product and need another programmer to help build out the rest of my system within the next few months for huge payouts!

Please share this, linked in, you've got it and repost it with as you can about Rfid/NFC mobile app database analytics who's looking for my company.

Thank you,
(808) 473-366-z
