Let me be your Digital Doc,

Having problems with your computer? Cell phone? TV? Camera? Some other digital piece of equipment? Need something set-up the way you thought it would be when you brought it home? Let me help you. I can fix anything that's wrong with your computer and set-up and configure any of these other digital devices so they work the way you want them to. Most of all, I'll show you how I did it and help you to better understand the workings of your devices no matter if it's your computer, cell phone, tablet, TV, camera, if it's digital and not in need of a blow torch and hammer, I can get it working. What I can't do is replace parts on your non-computer devices like screens, internal batteries (like iPhones and iPads) or fix a broken or non- working TV. But if it's something that needs configuring and you need to understand how to use it, I can help.

If it's a computer related problem, I can fix most things or replace them for you and explain to you how to work it in the future.

Please visit my web site, <http://yourdigitaldoc.net> , there's a questionnaire on there that you can fill out or call me at and tell me what you need fixed or what you need to better understand.

All letters of recommendation are from actual past and present clients that I have helped.

All the best,

Michael
