

# Beautiful Chazuta Imitator Dart Frogs (Southington)

Location **Connecticut**  
<https://www.genclassifieds.com/x-676523-z>

Hello,

I have several Chazuta Imitator Dart Frogs and Froglets that need new homes. All different ages. Chazutas are a thumbnail species of dart, full grown they are about 3/4"

I got their parents directly from UE in Canada.

The frogs/froglets readily feed on fruit flies and springtails. I use repashy calcium and repashy Vit A.

They are very healthy, active, beautiful and very bold.

Here are some pics of mom..dad..froglets..

Rehoming fee applies. These frogs and froglets are my hobby. I truly love them, so a great home is a must!!!!

Poison Dart frogs are not poisonous in captivity :) in the wild, the bugs they feed on eat and live on poisonous plants. Making it possible for the frogs to make their poisons. In captivity, darts are don't have access to those bugs and those plants :)
