Russian-to-English and English-to-Russian translation by father and son team. Father is a Russian native speaker with fluent English and son is an English native speaker with fluent Russian. Between the two of us we assure not only an accurate translation of your text, but also its natural flow and finesse - in either language.

Affordable rates (6 cents per word in most cases), fast turnaround.

The advantages of choosing local translators - as opposed to online services - are our accountability and availability to discuss your project with you on a personal basis.
