

Electro, Techno, Syntho, project (KCMO)

Location **Kansas**
<https://www.genclassifieds.com/x-677131-z>

I am looking for other people who want to put together a project that is like a combo of electro like Orbital, 808 State, Underworld, Way Out West, TCM, Chemical Brothers, etc and 80s synth pop and techno. I love techno and house and I am a house music producer and DJ. Want to do something different and more interactive now. I have software but I love using hardware. I have synths and drum machines and looking for others who also use hardware and software. I am looking to upgrade always but have enough to get started. If you are more software than hardware thats ok but would love you to like both. I want to have us all feed off each other and build great songs. I have Logic Pro 9 as far software. I am older but I am open to all ages and sexes. It's about the music. If it sounds like something you want to do get hold of me.

picture of my current rack and midi controllers and groove box. Like I say looking to add more when gets some money. lol Aren't we.
