Two married guys, seek intelligent and adaptable household help to care for comfortable and attractive country house in seaside location. Cleaning, grounds and garden maintenance, general domestic work in exchange for clean, fully furnished independent living quarters with separate entrance, private bath, kitchenette, laundry, all utilities. Approximately 10 hours work per week. No sexual contact wanted or expected, this is about home maintenance.

PS It has been repeatedly pointed out to us, that the term "houseboy" has nowadays, a sexual connotation. However we are of the generation that viewed the position as entirely respectable. Please pardon our out-of-date nomenclature, but what else does one call a gay guy who does housework for a couple of old queens? "Agador"? ;^)
