

I am a degreed mechanical engineer that specializes in 3D CAD Design, Product Development, and performing engineering analyses. I am proficient in using 3D CAD modeling software to create models for 3D printing, mold design, product design, manufacturing drawings and much more. I use SolidWorks and Autodesk Inventor to perform all of the engineering work as well as the Microsoft Office Suite. I can import from and export to, any CAD file format. Available Services Mechanical Design (roller bearings, belts, bushings, nuts, bolts etc.) Manufacturing/Industrial Design Consultation Animated and Exploded View of Parts and Assemblies Real Life Renderings Export Part file to STL for 3D Printing Drawings for Patent Applications Stress Analysis Finite Element Analysis (FEA) Sheet Metal Designs Weldments Many more services available! Feel free to contact me. Why should you hire me? I am an affordable option, and will save you money. I will work day and night to make sure your goals are met. I have a passion for mechanical engineering/design All of my CAD models are easily modifiable **KEYWORDS:** Modeling, Rendering, 3D, Industrial Design, Presentation, Presentations, Animation, 3D Animation, Animations, Mechanical, Mechanical Design, Mechanical Engineer, Mechanical Engineering, 3D Modeling, CAD, 3D Design, Product Design, Graphic Design, Conceptual Design, 3D Sculpture, Sketching, Design, Drafting, Draft, Draftsman, Drawing, 3D Drafting, Reverse Engineering, Visualizing, Visualization, Visualizations, Blueprint, Blueprints, Renderings, 3D Rendering, 3D Renderings. 3D Sketch, 3D Sketching, CAD design, CAD engineering, Computer Aided Design, Freelance CAD, Patent, Patent Drawing, Drafting Services, CAD drafting, CAD services 3D CAD Drafting, 3D CAD Drawing, 3D CAD Conversion, 3D CAD Modeling, Drawing Conversion, Napkin CAD, CAD Conversions, Paper to CAD, Blueprint to CAD, Inventor inventor services, product development, mechanism development, mechanism design, invention manufacturing,
