If you are a currently practicing licensed mental health clinician or currently enrolled in a counseling or clinical psychology masters/doctoral level program please read below:

The purpose of this study is to better understand clinicians' decision-making regarding psychiatric disorders. By participating, you will contribute to the field of psychology research as it pertains to assessment and diversity. Your participation is completely voluntary, and can exit the survey at any time. The survey takes no longer than 15-20 minutes to complete. You will read a brief vignette describing a clinical case summary and respond to a survey questionnaire regarding the case and about your professional attitudes on providing care as a mental health clinician.

Please click the following link to go to the survey: <https://www.surveymonkey.com/r>
