Selling a 1987 Honda fourtrax 350 4x4 four wheeler. No title, probably best for parts, but could be fixed up. These are a pretty solid machine. Four stroke motor and shaft driven. It has a manual trans. The plastic is very rough and is missing front rack. Motor is either locked up or kick start stuck. Was kicking over and then suddenly stuck. Most of the parts are there. I got it with hopes of fixing it up, but I don't have the time or money right now. Tires are fairly decent, but I think one needs a tube. Also needs brake work. In good condition these things sell for quite a bit. I'd like to get around \$600, but will consider offers. Buyer must.
