

Climbing Wall (Free Standing) Steel (550 USD)

Location **Vermont**
<https://www.genclassifieds.com/x-678112-z>

I purchased this wall for indoor training but never had a chance to use it.
Great for system training, bouldering or for youth climbing instruction.

Link for video demonstration: <https://www.youtube.com/watch?v=d6qBlz4P8bY>

The wall has been assembled once and climbed on for 20 min total.
It is currently not set-up, but all original parts are available.

This version has the extenders which allow for you to change the angle from 10-50 degrees.

The Boulderboard is the first collapsible freestanding climbing wall designed for use in apartments and homes.

With the Boulderboard you don't have to do without a hangboard because you don't want to lose your security deposit.

You don't have to forgo training because you "can't make it to the gym."

The Boulderboard has enough T-nuts to set up a system board, multiple 3-4 move boulder problems, or all of the above. The hold placements are symmetrical allowing for complete parity during training. There

is a pull-up bar for general strength training, quiet feet exercises, core exercises, and attaching additional equipment. And the pull-up bar is extendable so you get the most out of your finger locks and crown
