I slide my jeep into a tree the other night. It has a misfire and when a diagnostic was run, said a air leak in the gas line. Also possible spark plug area needs looking at. Air intake is blowing instead of sucking. Plus cross bar is buckled in which pushed the windshield. May be minor fixes, but I have no time or money to invest, need to sell to get another car. Will be willing to trade for operative vehicle. Great project jeep, starts, but needs work. Serious Inquires.
