Trying to find our 4 year old ball python to a good home. We bought him from petsmart in October of 2011 and he was born in September of 2011. The people there told us they thought it was a male but wasn't completely sure seeing as it was so young. I named him Pandora, he also comes with his cage, a dual heat lamp, and some accessories all those things come with the snake. I am asking that only people who are really serious about getting a snake and would give him a good home. When I took the first picture he was still shedding at the time so might look a little gray but he has very nice markings If you have any questions would be more than happy to answer them. Am asking for a fee but will discuss.
