STUDIO DRUM TRACK RECORDING

Location **Utah**
https://www.genclassifieds.com/x-678286-z

Looking to add live drums to your recordings? Don't want to use a drum machine or loops? I can provide high quality drum tracks over the internet for your CD project, demo, or industrial video. High quality, professional sounding tracks for a reasonable price! You send me your track with detailed info on what you'd like to hear, I'll send it back with my playing. Any changes you'd need would be made until you're happy. Fees are based upon the initial version and two additional ones (for changes). Additional fees may apply for more than three versions. After you're satisfied, payment is due via Paypal and then the tracks will be sent to you through DropBox.

I'm a working, professional drummer with over 38 years of playing/recording experience in virtually ALL genres of music, and I use state of the art drums, cymbals, mics and software. For more info on prices or to hear some demos of my work, please.
