My wife left her phone on the hood of the car after the fair today and we drove out of the parking lot headed for Anchorage before she remembered it. We immediately went back and looked for it where we had parked and it wasn't there. Our hope is that some good Samaritan found it and turned it in to the State Fair or they found it and are not sure what to do with it. If that's you, then please give me a call. The phone may have even been run over but, we would like to hopefully save the pictures and apps that are on the phone. Thank you in.
