Looking for an experienced mechanic to complete multiple jobs on my 2002 Jeep Grand Cherokee Laredo 4.0L 2WD. Certification preferred. The following is information that I know: car overheated and something blew. I have not driven the car in 2 years, and bought a new radiator and temperature sensor and a couple hoses that I wanted to install. Knowing this information I wanted to get a quote of how much it would cost to install these & fix my Jeep and probably flush out a couple things since the car has been idled for.
