My good friend Mr. Banana, my banana spider ran away. . .or did he?? He has been living in his web for a month now and just minding his owe. He is wanted dead or alive. Murder is suspected as there has been lingering birds circling our land and since my pug is too fat to be lifted we suppose they went for the easy shot. If you see a dead bird in marerro please contact me and I will come and dissect it and give you 5\$ for your trouble. If you find my spider I will have your name written in the sky over the dome. thank you and please watch your!
