

Cherryhead tortoise

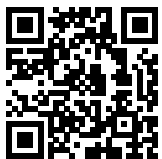

Location **Delaware**
<https://www.genclassifieds.com/x-678672-z>

I have a 4+in juvenile, looks to be female, Cherryhead Redfoot tortoise that I'd like to rehome. I had bought her and a couple others to grow up and add to my personal colony but just recently decided that I've got my hands full and I'd like to turn my focus back onto my other group of tortoises. I have 20 years tortoise experience and can tell that she's been very well cared for. She has some pyramiding due to being kept too dry with her previous owner. But in no way shape or form has that effected her health. Just cosmetic. She's got a bright red head and is starting to marble like true Brazilians do. This species of tortoise is the "dwarf redfoot", so if your looking for a pet tortoise that stays at a very manageable size and has beautiful coloration and pattern, she'd be perfect. And she's quite personable too. She eats right out of my hand and comes running (as fast as a tort can run lol) when she hears my voice.

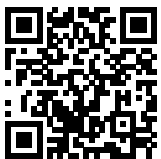

I am asking a rehoming fee of \$250.

If you'd like to know more about this species and are interested, email me and I will answer any questions you may have. Ultimately I want her to go to a great forever.
