

Friendly Professional Math Tutor (Nuuanu, but I Travel)

Location **Hawaii**
<https://www.genclassifieds.com/x-678693-z>

Hello, I am a friendly professional math tutor specializing in middle and high school math. I simply love math and try to convey my love and understanding to my clients. I try to show them that it is really not that hard and that it is something that they actually can do, as long as they put in the effort. I do not do the homework for my clients but I do assist them in getting it done and helping them to understand the requisite concepts.

I am the owner of Akamai Tutoring and have been tutoring for over 20 years. I started in my teens, helping relatives and friends to succeed in their goals and it has turned into my career. I can come to your home, or meet at a local library. I can also meet at parent's office or workplace if it is allowed. If you are just visiting Oahu, I can also help you short term in the Waikiki/Ala Moana area.

My rates are \$45/hour if you are in town, or close by (Kaimuki to Aiea, plus Kaneohe and Kailua), and \$50/hr if I have to travel a greater distance. I travel as far as Mililani and Hawaii Kai during the evenings and weekends. As an experienced local tutor, I am familiar with most of the curricula from both the public and private schools. I especially enjoy helping students understand Pre-Algebra, Algebra I & II, Geometry, and Trigonometry. Helping younger students is also very fun for me. A lot of times, there are just a few stumbling blocks that are preventing their progress.

Most of my students are regularly scheduled for once or twice a week, however, you are welcome to schedule on an as needed basis. The only drawback in this case is that I give scheduling priority to my regulars.

I am easy going and not an intimidating task master. I am very patient and understanding. If you have a student who is trying to do well, but simply needs more individual instruction than the school can provide, I am your tutor. It doesn't matter how well or not your child is currently doing. If your child is struggling to understand the concepts, then I want to help him/her. Struggling leads to growth.

I also help homeschool students and I also do SAT Math Prep. I am very reliable and if you make an appointment, you can count on me to show up.

Please email me for more info or to set up an appointment. I have a pdf file that I send out on my main letters and it has which I have generated from my website. I can email you the pdf file if you request. I am easily reached by phone or texting at 808-338-3383. Please write down your name and number to be able to differentiate you from any other.
